

SUSTAINABLE WATER MANAGEMENT SOLUTIONS

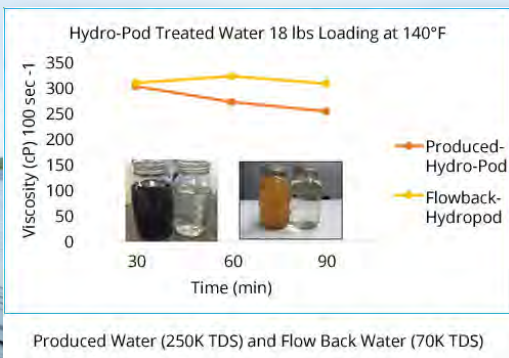

PRRO Water from PFP Industries provides a one-stop solution for produced water treatment and allows 100% reuse of produced water. This lowers the fresh water demand, minimizes the environmental concerns, and reduces the infrastructure and overall water management costs while improving the economics of your development projects.

How PRRO Water Turns Challenges Into Advantages:

- Water Scarcity → Reuse through Effective Treatment
- Environmental Concerns → Removal of Contaminants and Reduced Trucking
- Infrastructure → Little to None Required
- Produced Water Management Cost → Single Source Reduces Cost
- Fluid Compatibility → Knowledge, Expertise, Technology, Chemistry

Produced Water To Cross-Linked Gels
